

Korea, Inspiring

Korea is a viable place to serve as an international hub for Asia, due to its unique geographical location adjacent to China and Japan.

With a five-millennia-long history, Korea is an attractive place to visit and has its own unique cultural heritage, distinct from that of other Asian countries. A visit to the country's numerous historic relics, seven of which are designated UNESCO World Cultural Heritage Sites, will make the CTBUH 2011 participants' journey all the more special.

Seoul, the Capital of Korea for over 600 Years

Seoul, the capital of Korea, is the heart of Korea's culture and education as well as politics and economics. As a city with a history of more than 600 years, Seoul is unique in that historical sites and modern cultural facilities coexist in harmony.

And it is always bustling with colorful events, performances and reenactments of traditional activities as well as many international events including the 1988 Summer Olympic Games and the 2002 FIFA World Cup Korea / Japan.

Perfect Venue COEX

COEX is Korea's top venue for international Conventions & Exhibitions. It has an auditorium large enough to house more than 7,000 people and has 7,500 hotel rooms within 5km radius.

COEX, a 4,704,798 square-foot complex, also houses the Korean World Trade Center, and shares a home with two 5-star hotels, a casino, a major department store, prime office real estate, in addition to being Seoul's most popular and Asia's largest shopping mall including duty-free shops.

CTBUH 2011 World Conference

October 10-12, 2011 | COEX | Seoul | Korea

WHY TALL?

Green, Safety & Humanity

Welcome Message

Greetings from Chairmen

It gives us great happiness to deliver news on the CTBUH 2011 World Conference that is scheduled to be held at COEX, from October 10 through 12, 2011. The Council on Tall Buildings and Urban Habitat(CTBUH) is an international nonprofit organization that was established to promote technological advancements and information exchange among experts all across the globe in relation to high-rise building planning, design, construction, and management. As a means to realize this goal, CTBUH regularly holds international conferences. The Conference, scheduled in October, 2011, will focus on the significance and value of high-rise buildings in modern society from three perspectives: green, safety, and humanity. Thus, the theme of the conference has been set to **"Why Tall? - Green, Safety & Humanity"**.

A decade has passed since the beginning of the 21st century. The global community is experiencing many political, economic, and social conflicts and collisions. The high-rise building construction industry also has a great number of issues and challenges that need to be overcome. Top industrial and academic experts in the field of super high-rise buildings will come together at the Seoul Conference to share their knowledge and experience. We believe this conference will substantially help you take on challenges towards a better future.

The Conference will also provide you an opportunity to experience the dynamic aspects of Seoul and Korea in terms of economic viability and cultural diversity, especially since many high-rise building projects are taking place or are planned in Korea. We hope to share a memorable experience with all of you in Seoul this October.
